

**itelligence AG reports repeated success in the area of the automotive and service industry**

### **Engineers of EDAG AG commission itelligence AG as global SAP consultation company**

Bielefeld, September 22, 2005 - EDAG Engineering + Design AG – one of the largest automotive development service providers with around 4000 employees, has chosen itelligence AG as its SAP consultation company. The EDAG Group, which is specialized in the vehicle industry, offers full-service development and project management expertise for the vehicles and production facilities up to construction of the facilities and small-series production.

itelligence now supports the international SAP introduction with roll-outs in the individual EDAG subsidiaries for the company's SAP users of around 2500 in 32 branches worldwide. In this project, itelligence AG is assuming consultation of the internal EDAG team in Fulda and accompanying the SAP roll-outs to Australia, Brazil, China, India, Malaysia, Portugal, Spain, the Czech Republic, Hungary, and the USA.

The logistic SAP processes defined in the template, the sales and project management workflows, and the respective finance aspects are being rolled out together in the individual EDAG subsidiaries.

Another key project component is the introduction of the SAP Strategic Management module, part of SAP's business planning simulation (BPS). The advantage – EDAG AG can thus manage its global projects using comparable key data quickly. For EDAG, exchanging information via all subsidiaries and areas, with maximum transparency in the projects, is at the forefront of the global SAP introduction. The project started in mid-August 2005.

Markus Diegelmann, the responsible project manager at EDAG Engineering + Design AG says "itelligence convinces us with its comprehensive, industry-specific SAP expertise, an international position, and the extensive references in our industry. Being able to carry out the international roll-out with a consultation company in particular and, in so doing, pursuing a middle-market, pragmatic approach suits us and shows us that itelligence is the right consultation partner."
