

SAP consulting house itelligence at Systems 2007 – Hall A1, Booth 219 and in the ERP area in Hall A1, Booth 201-44

Complete, compact and the highest level of quality for SMEs - itelligence demonstrates SAP at Systems

Bielefeld (Germany), October 23, 2007 – With the motto "complete in scope, compact in price, uncompromising in performance at the highest level of quality", itelligence, the full-service IT provider in the SAP environment, is showing its offerings from its it.compact industry program and its it.compact packages. This year, the packages and solutions are especially tailored to the needs of the lower midsize market.

itelligence is presenting its eight new SAP Business All in One solutions for industry sectors to the general public for the first time in Munich: it.compact manufacturing, it.compact plastics, it.compact chemicals, it.compact automotive, it.compact metal, it.compact service, it.compact pharma, and it.compact hightronics. The preconfigured solutions shorten the project introduction time for SMEs acting in these sectors. The it.compact industry solutions operate with the latest SAP standard and already contain software add-ons for the special needs of their respective segments.

In the framework of its successful it.compact program, itelligence is showing an additional trade show novelty – for the first time, itelligence is lacing up its predefined service package for process consultation. The it.compact packages have also been considerably enhanced for accounting. All itelligence it.compact packages deliver solutions with clearly defined price/performance ratios for the requirements of the most varied application areas of SAP software. Smaller tools for the daily routine are also included in the total offering of the it.compact package. With their distinct tailoring, they guarantee a quick, reliable, calculable and most importantly, a targeted project implementation.

Press Release - itelligence
