

Singleplast introduces SAP industry-specific solution from itelligence

Frankfurt, October 01, 2001. The IT service provider itelligence AG has been entrusted with the implementation of its own industry-specific solution it-engine-components at the plastics processing company, Singleplast. During the course of this project, itelligence will provide consulting and training services along with its own industry-specific overall solution qualified by SAP. The productive start of it.engine-components in the departments Financial Management and Logistics is planned for the beginning of 2002.

Singleplast, Herford, Germany has a staff of 70 which produces thermoform and injection moulded parts made of plastic. The midsize company supplies plastic parts to all lines of business throughout Europe. Singleplast places a high value on short paths between design and production. Following introduction of the ready-to-work SAP industry-specific solution, Singleplast will be able to monitor and steer the entire order flow, from order recording to inventory check to production control and planning, more efficiently. Singleplast was convinced by the simple, intuitive use of the industry-specific solution as well as by the possibility of also integrating partners directly into the production process in the future. "Almost 75% of our customers already use SAP. We expect substantial optimization potential from the inclusion of our customers and suppliers in the system," confirms Andreas Single, general manager of Singleplast.
