itelligence AG – the innovative SAP full-service provider

Frankfurt, August 29, 2002 - itelligence, the SAP full-service provider, will present itself as an innovative partner to large corporations and medium-sized companies at the Systems 2002 show from October 14 to 18. The focus of the company's exhibit in Hall A1.120 will be on the latest SCM (supply chain management), PLM (product lifecycle management) and business intelligence trends.

A special highlight will be itelligence's presentation of practical examples of the SAP portal solution. The SAP full-service provider has been able to establish itself as a leading SAP partner in this area within a very short space of time. Visitors will also learn more about itelligence AG's offerings as an operator of modern service centres designed to fulfil customers' outsourcing, service and ASP (application service providing) requirements.

itelligence AG is not only a successful partner in the implementation of the latest mySAP.com solutions. The company's SAP-based vertical solutions are already being used by a large number of customers. Detailed information on these vertical solutions will be provided at the itelligence booth.

The SAP portal technology has been available in Germany since December 2001. Taking Nordenia International AG as an example, itelligence will show what a company-wide information system with business intelligence aspects can look like. The showcased project will also demonstrate how heterogeneous IT structures can be standardized via mySAP EP (enterprise portals) using the SAP portal technology.

Other examples will take a closer look at new technologies such as CRM (customer relationship management) and SRM (supplier relationship management). The customer projects exhibited will provide trade visitors with information on the strategic management and orientation of distribution activities and the use of KPIs (key performance indicators) for managing distribution processes and identifying new market opportunities using mySAP CRM solutions.

Systems 2002, October 14-18
itelligence AG – the innovative SAP full-service provider

In the Financials section itelligence will demonstrate the use of SEM-BPS (strategic enterprise management – business planning and simulation), a mySap financials component, for planning the revenues of a global IT corporation as well as the development of a group-wide planning process using bottom-up/top-down planning functions. Aspects such as the flexible modelling of planning approaches and role-specific execution of plans will also be taken into account.

The service business in the engineering sector provides the background for a demonstration of the concept of Product Life Cycle Management: installation of an as-built structure, spare parts management, servicing structures and maintenance levels.

The itelligence HR – Guideline will demonstrate the adjustment and implementation of dynamic structures and business processes. What strategic basics can be created using such mySAP HR solutions as mySAP Organization Management? How can executives leverage the full benefits of the Informations Cockpit Manager's Desktop? These and other questions will be explored and answered at Systems 2002.

itelligence AG's vertical industry solutions:

itelligence offers proven vertical industry solutions for medium sized companies. Carefully adapted to the needs of specific industries, these solutions demonstrate itelligence's experience in the implementation of complex projects within medium-sized organizations. The following vertical industry solutions will be presented at the show: it.automotive supplier, it.chemicals, it.engine (engineering and high-tech industries), it.service (services sector), it.trade (wholesale distributors), it.wood (woodworking and furniture industry), it.metal (steel and NF metals industry)

Lotus Competence Center featuring Blackberry

itelligence's Lotus Notes competence center for the first time features Blackberry, the mobile solutions company. itelligence leads the industry through its partnership with O₂ which uses push technology to feed email and diary data to SAP-based mobile solutions. In addition, Lotus Notes specialists will be on hand to demonstrate content management techniques under Lotus Notes.

Certified partner for international SAP projects

Internationality, comprehensive industry know-how and a close cooperation with SAP are among the hallmarks of itelligence AG. Currently employing some 1,450 people, itelligence boasts an exceptionally high number of SAP certifications which is matched by few SAP partners worldwide. itelligence has meanwhile acquired VAR (value added reseller) status, offering advice on, licensing of, and support for SAP solutions. itelligence AG has also been certified as a Hosted Solutions Channel Partner, which allows the company to market its successful SAP vertical industry solutions to medium-sized companies and to provide outsourcing services for these solutions. The latter certification highlights itelligence's particularly high qualification in the outsourcing area. Finally, the "SAP Alliance Partner – Services" certification has elevated itelligence to the select circle of strategic SAP partners who can offer major customers consulting services for SAP solutions and manage the implementation on these solutions. SAP and itelligence continue to work on strategic solutions and new developments through an extensive exchange of information.

About itelligence AG:

itelligence AG is a leading international SAP full-service provider employing some 1,450 highly qualified employees at 45 branches in 18 countries. As a mySAP.com Channel, Alliance and Hosting Partner, itelligence realizes complex projects in the SAP environment for over 750 customers worldwide. The company's services range from SAP consulting and licensing to outsourcing and services to proprietary industry-specific SAP solutions and individual software technologies. In 2001, itelligence AG generated total sales of EUR 182.9 million (ISIN DE 000 730 040 2).
