

### **Systems 2002 - Exhibition highlights in Munich**

itelligence AG highlights its expertise as a full-service provider for SAP for medium-sized companies and international corporations

- **itelligence implements SAP Business One solution and exhibits first SAP One Server System**
- **Portal solutions for company-wide access to corporate information**

Frankfurt, Sept. 30, 2002 - At this year's Systems in Munich, itelligence, the full-service provider for SAP, will demonstrate its technological leadership and market expertise for medium-sized companies and international corporations. In Hall A 1, booth 120, itelligence will present SAP Business One as an end-to-end solution at a special exhibition price of EUR 199 per user. This year's Systems will also see the premiere of SAP's new server concept presented by itelligence: SAP One Server. itelligence will offer a comprehensive solution package comprising mySAP.com, Business Warehouse and mySAP CRM (Customer Relationship Management) as well as it.engine, itelligence's proprietary industry-specific solution, on a single server.

#### Focus on medium-sized companies

SAP Business One, the new SAP solution for small medium-sized businesses, has already been used successfully by OSRAM Light Consulting, an itelligence customer. itelligence intends to announce more project contracts for Business One at the trade show.

SAP's new server technology, SAP One Server, will be presented to the public for the first time at the itelligence booth. This new tool kit enables a whole range of solutions for medium-sized companies to be installed on a single server. mySAP.com, Business Warehouse, mySAP CRM as well as it.engine, itelligence's proprietary industry-specific solution all run on a single server. This clearly reduces complex project and pilot phases for the introduction of mySAP.com, while cutting hardware costs and administrative expenses at the same time. This effect will be particularly interesting for new medium-sized customers in the SAP environment.

## **itelligence AG highlights its expertise as a full-service provider for SAP for medium-sized companies and international corporations**

Apart from the focus on medium-sized companies, itelligence's exhibit will be characterized by the successful implementation of next-generation portals and marketplaces on an SAP basis. In this context, itelligence has already announced a new project: Nordzucker AG's web portal based on mySAP Enterprise Portal 5.0. At the Systems show, itelligence will present examples of the Nordenia International AG portal. As an international full-service provider for SAP, itelligence's 1,450 employees implement projects in 19 countries.

itelligence's close relations with SAP AG allow the company to implement new technologies quickly and consistently, thus giving it an important competitive advantage. itelligence will present examples of such technologies in the area of customer relationship management, supply chain management and product lifecycle management.

### **Vertical solutions for international markets**

At this year's systems, itelligence will again exhibit the proven SAP vertical solutions: it.automotive supplier, it.chemicals, it.engine (engineering and high-tech industries), it.service (services sector), it.trade (wholesale distributors), it.wood (woodworking and furniture industry), it.metal (steel and NF metals industry).

Since 2001, itelligence has been Special Expertise Partner mySAP Consumer Products, one of the first SAP partners in this segment. The Consumer solution for the food industry presented at the trade show primarily stands for consistent logistical processes along this special value chain.

### **Outsourcing & Services**

The presentation of itelligence's Outsourcing & Services Division will focus on practical examples of the SAP Solution Manager as well as Catalogue Management for E-Procurement, SAP and IT Outsourcing.

The Outsourcing & Services Division operates state-of-the-art service centers for outsourcing and support services as well as for application service providing. Highly specialized teams support the outsourcing processes technically and organizationally at five locations in Bielefeld, Walldorf, Bautzen, Cincinnati (USA) and Poznan (Poland). These centers serve small and medium-sized customers as well as large corporations throughout Europe and in the USA. This kind of cross-border service allows itelligence customers to benefit from this full-service concept irrespective of their location.

Lotus Notes Competence Center

As a certified O<sub>2</sub> partner, itelligence AG develops solutions for communication between BlackBerry and Lotus Notes. itelligence will now present Europe's first mobile sales management solution in the Lotus Notes environment. This new solution facilitates mobile data inquiries via BlackBerry in management applications.
